Thanks for the information! I'll do whatever will help you get through your review faster :)

In the matrix that I started preparing for the 9-plan, I used the latest version of the matrix (attached) and I tried to include a very detailed description of each management action (i.e., the entire text of each management action from the alternatives table) for each COT issue that each management action addressed, respectively. I am basing the matrix that I started preparing on the matrix that I was given by BLM for the 9-plan. So far, I have included only the management actions from the preferred alternative. I am in the process of seeking guidance to find out if I need to prepare a separate matrix for each alternative. I think whatever you could provide me in terms of a matrix would be very helpful. I am attaching the latest version of the matrix, so that you can use that if you prefer. It is the version that I am using.

Thanks!  
Alex

Do you want a just a list of the management actions that would respond to the COT Issue/Conservation Measures, a summary of the management prescriptions like Buffalo did, or do you want something more detailed (like the entire text of the management action)?

For instance:

Retain sage-grouse habitats within PACs (pertains to PAC designation; actions below this line are evaluated independent of PAC designation for each Alternative)

So far we have 5 management actions that are either directly related to sage-grouse habitat or are "residual" management actions that benefit sage-grouse habitat.

Hopefully that makes sense.
