Beaming psychic thoughts of brevity now...

I think we should (and can) find a way to distill all of the great work Ken and Co. are doing into an even more succinct and accessible presentation, not unlike what Fred W. has done with the ACK-55 information. Something like:

1. Invasives-fire complex: status of the problem and its implications for GrSG
2. WAFWA-FWS partnership and approach to address the above
3. Key issues and findings
4. Strategies and Tactics on the ground
5. Policy and funding opportunities
6. Conclusions/next steps

He/we can deliver the short version and provide the supplemental content for various audiences.
