Hi Lynn

We have put a version of our final report on Erik Blomberg's website (<https://sites.google.com/site/erikjblomberg/disertation-research/falcon-gondor-transmission-line-stu>). We have cautioned folks that, while we do not anticipate major changes, the report has not been peer reviewed. We are preparing manuscripts for publication that should appear over the next 2-3 years. For now, however, the final report is the most complete source for our findings.

Jim

Jim, I accessed your progress report dated Dec 2011 and have read that. What more recent updated information do you have that I can access at this time? Your research results would be used for FWS annual species assessments for candidate species, which we produce every year. Sage-grouse has been a candidate since 2010 and species assessments have been completed for 2 years so this species assessment I am putting together reflects information from 2012. Threats assessments are always part of the species assessments for any candidate species. Any updated information from your research could be helpful so we have the most up to date information we can gather for this next species assessment. Thanks, Lynn
