Many thanks.

All, I've been requested by my ARD, in response to inquiries from HQ, to determine the current status of the consultations for sage grouse amendments **and** revisions. I've attached a table identifying each EIS and the associated FWS office. I have some information on some consultations, but would like additional information and confirmation of the information in the table. Please review the table and fill in the blanks for the consultation your office is responsible for.

For the last 9 months, we have been operating on an assumption and expectation that the Service will complete these documents by **July 15, 2015** and I have tentatively confirmed that date with my BLM counterpart this afternoon. If you are operating on a different (later) expected date please indicate that date in the table and how this later date was arrived at.

If you do not see the correct contact in the list of recipients of this email – please forward to appropriate office or person.

Thanks for your quick response on this.
