I believe one of the states mentioned their effort at the WAFWA EOC meeting two weeks ago. I know several states had a meeting but I have not heard from any of them. The WY field office has been coordinating with the state of Wyoming. The State's database is not operational yet. I'll let you know if I hear anything different from the database team.

I gave a briefing on our draft database at the meeting and we're coordinating with the States through the RISC team to set a testing and review schedule for this spring.

Have we heard anything on this matter since the Task Force meeting in early February?
