Ok. This sounds great.
Thanks!

Subject: Raptor guidelines for Buffalo RMP

I talked with Tom Bills today after noticing that the BLM still hadn't changed the raptor guidelines to be consistent with Wyoming's recommendations. He thought they were consistent and it was their intent to be consistent with our guidelines. With the change of wildlife staff he said something must have fallen through the cracks. He asked me to send him the table from our attachment so he could just put the whole table in the Appendices. He is changing the tables in the RMP also so they are consistent with our recommendations.

Pauline (Schuette) Hope
