Hi, Amy,

I just saw this email. I apologize if we didn't get to the main point you were trying to get across on the call yesterday. I think this warrants further discussion on the call next month and with a more focused group prior to that.

Thanks so much for all that you do!

Julie,

Just a point of clarification for the greater sage-grouse agenda item. My intent was to have a broader discussion about gsg impacts ie broader than what is typically considered in an HEA. This item arose out of a discussion I had with Pat Deibert a few weeks ago. The goal is to pull together something that can be referenced (or included) in the Framework. I suggested to Pat that we would put it together and give it to her for review.

Subject: Reminder - FO transmission team call on Wednesday, May 1 at 2 pm (Mtn)

Hi, all,

I am looking forward to our call on Wednesday. Thanks to the folks who emailed me agenda topics - it sounds like we will have a some good discussions. Please think ahead and maybe jot down some ideas regarding our discussion topics.

Call in: 1-866-650-7570

Passcode: 889-6811

Agenda:

1) Project updates

Boardman to Hemingway

Cascade Crossing

Energy Gateway South

Gateway West

TransWest Express

Zephyr

BPA

Vantage - Pomona

Others?

2) Important Issues and Topics

Sage-grouse: FYI...Knick et al 2013. Modeling ecological minimum requirements for distribution of greater sage-grouse leks: implications for population connectivity across their western range, U.S.A. Ecology and Evolution. See attached and press release: <http://www.usgs.gov/newsroom/article.asp?ID=3567&from=rss#.UX6hm3WvN8E>

Sage-grouse: think ahead...List of impacts transmission lines have on sage-grouse. What specific direct and indirect effects should all transmission lines review in their HEAs (or similar; for consistency among t-lines and to provide a scientifically-based defense for our recommendations)? Review projects we are currently working on and pull all potential direct and indirect impacts - we can add to the Google Drive spreadsheet that I am creating and sending out. We can work on this collaboratively with our new email system!

Migratory birds/RRTT: FYI...Still waiting to see draft migratory bird conservation plans (GWW and EGS); potentially waiting for BLM to receive guidance from their HQ.
