Action area defined by USFWS Endangered Species Act - Section 7 Consultation, BIOLOGICAL OPINION, U.S. Fish and Wildlife Service Reference: OIEWFW00-2016-F-0121 Programmatic Consultation for Shellfish Activities in Washington State Inland Marine Waters (pg 40):
At all locations, the action area extends a minimum of 2,000 ft from the farm footprint (active and fallow). This distance encompasses those areas of the nearshore that may experience temporary effects (e.g., temporary effects to water quality, temporary effects to the sound environment, etc.).

This is the definition of the area surrounding the lease identified on the map attached.

Jennifer Brown-Scott
Project Leader
Washington Maritime National Wildlife Refuge Complex
715 Holgerson Road
Sequim, WA 98382
(360) 457-8451
