---

I am not available tomorrow, but will block off my calendar for a call at noon, on Monday. You can call the office (360) 457-8451 x22.

Hope you have a fabulous Friday and a wonderful weekend.

-jennifer

P.S.: Thanks for the kind wishes in your original message.

**Subject:** RE: [EXTERNAL] Call to discuss Special Conditions of USACE Proffered Permit

Hi Jennifer,

Sure. Below are the special conditions referred to in the Initial Proffered Permit that I would like to briefly discuss with you.

“a copy of the U.S. Fish and Wildlife Service’s determination of the work activities authorized by this permit being compatible with U.S. Fish and Wildlife Service’s management, laws and executive orders, policies, and treaties”

“a monitoring plan for assessing disturbance to wildlife from work activities and structures and from the potential impacts to accretion and long-shore transport of sediment. This plan should be developed in coordination with U.S. Fish and Wildlife Service.”

We had discussed the compatibility determination last August and it was my understanding that was being developed by your team concurrently with the timing of the Section 7 consultation; however, I haven’t heard anything more about it since our last conversation.

Unfortunately, I have a meeting that will run until noon on Monday, perhaps we could talk briefly tomorrow (Friday) any time before 10 AM or after 12 PM, or Monday at noon? It won’t take long, just wanting to determine the status of the compatibility determination and identify your team’s availability for coordinating on the monitoring plan over the next month or so. Is there a good

number for me to reach you at?

Thanks,

Liz

Thanks for reaching out. I am available for a discussion on Monday, after 11am.

Could you share the permit conditions, so I can get a better idea of what we will be discussing?

Hope you are having a great week.

ACE permit has been proffered. Liz has asked for a call to discuss the CD and monitoring plan (below). I do not have a copy of the permit or the associated NEPA docs. The CD should be related to debris removal. This would be a good time to get Mig Birds involved to re: monitoring plan.

Hello Jennifer,

I hope you are well and have been staying safe during this unprecedented year.

I am reaching out to see if we can have a quick conversation about the Initial Proffered Permit for the Tribe's oyster farm that was sent out by USACE last week. There are a couple of Special Conditions that require further coordination with U.S. Fish and Wildlife Service. One being the status of the compatibility determination per our August 2020 correspondence, and the other to develop a monitoring plan in coordination with USFWS.

I realize that you are likely working from home, so if you could let me know when would be a good time for you to have a quick call and the best number to reach you at that would be great.

Thank you,

Liz
