---

I had to run some errands, so I dropped it at the front desk.

Hi Jennifer,

Oh yes, I am very much enjoying the return of the sun ☺ I hope you had a nice vacation and weren't too overwhelmed with emails when you got back! Thank you very much for compiling the data request for us! If you would like to swing by the natural resources office to drop off the jump drive, that would be great. I am also happy to meet you at a half way point later this afternoon if you don't want to make the trek all the way to Blyn.

Liz

Elizabeth,

Hope you have been enjoying the beautiful spring weather. I just tried to send you the information you requested and am running into an issue with file size. I can swing by with a thumb drive if that would work for you.

Thanks,

Jennifer

Hello Jennifer,

Jamestown would like to thank you and Lorenz for meeting with Hansi, Diana and I regarding the Tribe's aquaculture project on the Dungeness lease site. We found the meeting to be quite productive and very much look forward to working with the Refuge as the Tribe moves forward with the Individual Permit. Attached please find the notes from our meeting on 5/24/2018.

Per our discussion, the Tribe is requesting any available data/information that the Refuge may have on the following:

- Shore bird/water fowl data – we are happy to receive raw data or in database format, from any time period and location collected within or in close proximity to the Refuge. If time constraints for compiling data older datasets are of concern, our preferred time period is 1980 – 2018.
- Shellfish aquaculture contribution to marine debris
- Forage fish data
- Benthic/epibenthic community structure and composition data
- Human disturbance data – particularly response of shore bird/water fowl to human activities

Any quantitative/qualitative data or even anecdotal information on any of the above would be extremely helpful as we prepare our site-specific environmental assessment. The Tribe is happy to coordinate with Sue Thomas in acquiring any available data and information about methodologies used.

Thank you very much for your assistance as we move forward with this process.

Sincerely,

Liz Tobin
