Hey there Anita,

A while back you sent Clallam Co Midwinter data up through 2009. I'm trying to assess Dungeness NWR in the grander scheme of things and wonder if you could send me data from 2010-2018? I'm only looking for summaries of Dungeness Bay to Three Crabs and the Harbor if that helps, but I can pull them from the spreadsheet if it is similar from the older version (attached).

Thanks for any help you can give,  
Sue

---

Anita,

I was finally able to get back to finalizing all survey data for the Dungeness surveys I completed on January 6<sup>th</sup>. Attached you will find completed survey forms, a copy of my field notes, and a summary sheet for the surveys. I also included a few maps for the Bell Farm pond area that we should include on Kim's list for sites to search next year. I bet I would have found ducks there if the ponds were not frozen.

I believe I now have all of my 2014 MW survey data submitted to you. Whew!! Hopefully you can let Don know that the deer with the arrow took higher priority last week or we could have easily met his deadline. Please let me know if you have any questions regarding any of the three data sets I have sent your way.

I will be out in the field most of the day tomorrow and again Wed. morning.

Best of luck with data compilation. Please send the finalized records to me when complete. I'll be interested to see the results from all the other observers for sites I have covered in past years.

Thanks,

*Shelly Ament*  
*WDFW Wildlife Biologist*

 Surveyed by Hussey

# Survey Area: Sequim – Dungeness

January 6, 2014

<u>Priority 1</u>	<u>Priority 2</u>	<u>Priority 3</u>	<u>New Site</u>	<u>Search Areas</u>
3 Crabs	Jones-Marshall	Clapp West	None	**Bell Farm
Golden Sands	Meadowbrook			(Add this site
Hussey	Friendly Lane			to list to be
Willits	Towne Road			checked next
				year.)

\*\* Map sent with 2014 survey data.

## Notes for Anita

- 1) Good weather conditions and visibility for all surveys on January 6th. There were freezing conditions the night before. There was frost on the ground in the morning and many ponds were partially or fully frozen during the survey. (None of the sites were frozen during the aerial survey conducted on 1/3).
- 2) I documented no new sites for the day. Although I checked fewer sites than in past years, I spent time walking into ponds at various sites. It was a full day just checking documented sites and I really had only one lead for any new sites in this survey area (See #3 below).
- 3) I remember John Willits telling me about new ponds at the Bell Farm. I decided to check this area to start the day. Three really nice ponds but all were frozen. No ducks observed but we really need to include this site on our search list for next year. I see no need to document for Don until we record counting some ducks there. I will be sending you a map with my 2014 data set. We could consider as a separate site or simply add these ponds to the Seashore Lane site since they are adjacent to the west.
- 4) Three Crabs presented a challenge for counting the high number of birds present and for identifying birds that were far away. We may want to have an extra observer at this site in the future when waterfowl numbers are high. Some groups of birds were also moving around (flush/re-landing during the survey) so it was difficult to have an accurate count. I did the best I could. If not pressed for time....I would have stayed longer at this site.

Maybe next year I will ask Denny Van Horn to come join me for the count. (He lives where the Dungeness Store used to be.)

- 5) You can review my field notes to get any specific details about the surveys. I did not include any time information on my survey form but this is recorded in my notes. Please know I did end up talking with various people at some of the sites.
- 6) I did include the Wilson Field and Fairbanks counts in with the Friendly Lane tally (as we discussed last week).
- 7) As usual - I did include the count from Gary and Elaine's pond with the Meadowbrook Creek count.
- 8) I did not find any obvious corrections needed on Don's list for the sites I surveyed in Dungeness.
- 9) It was interesting to note the dramatic change in waterfowl numbers along the saltwater with the variation in tides. Counts can be so different at one site within a fairly short range of time. I'm not sure how to deal with this issue but simply wanted to point it out. Something for us to think about for next year.
- 10) The only hunting I was aware of during the day for sites I surveyed was on Willits property. His ponds were all frozen. No ducks reported by John and I observed no ducks during my search of his property. No hunting at Jones-Marshall or Hussey sites.
- 11) I did take numerous photos during the day of Dungeness surveys until my camera battery died. I will likely not get to labeling and organizing the photos to provide to you until I catch-up with some other survey data tasks (H. ducks, eagles, TCB).

# Mid-Winter Waterfowl Survey <sup>①</sup> Dungeness

Date: January 6, 2014

Observer: Shelly Ament

Weather: Freezing temperatures overnight. Lots of Frost in the morning. Temperature @ 0830 = 30°F. Mix of sun & clouds to start the day. No precipitation or wind.

\* Numerous other observers covering all other Dungeness sites this same day. Dungeness Refuge to be covered 1300 - 1500 (or so).

Decided to start day by checking Bell Farm ponds. I was aware that some new ponds were installed → DU project. Left house @ 0840.

Bell Farm (not on list) 0845 - 0930  
Parked @ open metal gate and hiked around area. Some kale, leeks, etc. growing along road into area. Grass more to the east.

(2)

Three nice ponds. Sheet water areas in surrounding area. All ponds were frozen. Numerous decoys and some hunting blinds @ 2 of the ponds.

Took various photos (for John W.)

No ducks @ ponds. Did see one pair of mallards flying far to east but will include w/ Friendly Lane count.

\* Want to put this site on search list for next year.

Friendly Lane (0940-1035)

(Will add in Wilson Field + Fairbanks counts later).

Parked near end of frozen mud road on Willits. Main field w/ brussel sprouts + cabbage to the east. Grass and cover crops on fields to west.

No ducks in fields visible from the road. Hiked over to hunt-pond to the west.

15 mallards flushed off pond. Pond mostly frozen. Lots of decoys present + hunt blind on south edge.

\* Took some photos.

Hiked to north to Fairbanks Field. (3)

No ducks or swans @ field but did observe one pair mallards flying to east.

Anita sent me a text around 1020 (looking for window mount for scope). Left area around 1030 & headed to Wilson Field.

Wilson Field - Drove up to field off Sequim/Dungeness. Scanned w/ binos. No ducks or swans present, Frost. Most of field recently plowed & planted w/ cover crop, some leaks to north & scattered rows of cabbage/strawberries. Saw ducks flush & re-land @ Elaine's pond → she is counting them for me.

Clapp West (1035-1045)

No swans, ducks, or gulls today. A few rows of carrots in south area (81)  
Most of field recently plowed & planted w/ Java beans.

While driving across Dungeness River bridge I saw 4 Common Mergansers in river.

The mergansers (1 ♂ and 3 ♀) were (4) swimming downstream, (Not really sure if I will include in count → likely not).

### Towne Road (1055-1140)

Parked along road @ various locations & scanned fields on both sides.

No ducks or swans @ the Brown Farm but lots of gulls present.

Drove and parked at gravel pit area at south hilltop area. Scouted wetland area on Delta Farm. No open water. Lots of pigs now encroaching to wetland area. Looked like so fill materials being put in wetland area! Took photos → need to follow-up on conservation conditions for property.

Gulls, pigeons, & crows were all active on compost piles.

\* Did observe 3 adult swans flying overhead E → W.

Drove into Delta Farm, set-up scope on window mount.

Pond was  $\frac{3}{4}$  frozen. Only open water was @ SW end of pond,

(5)

86 wigeon

1 domestic "Indian Runner" duck

1 American coot

3 Mallards (2 ♂, 1 ♀)

53 Gulls

Talked w/ Sam (Nash's head plow guy).  
Discussed wetland "filling" and power line modifications + marking of lines by PUD.

Headed back to my house. Parked and walked portions of Meadowbrook Creek,

My property: (1145-1215)

2 ♂ mallards

3 ♀ mallards

(Will add other counts from lower portion + Elaine's pond later)

Took a lunch break @ house until 1310.

Searched Meadowbrook Creek while heading to the 3 Crabs.

Lower Meadowbrook Creek

(6)

15 wigeon

3 mallards (2 ♂, 1 ♀)

2 A. coots

→ east of bridge

} To west

Three Crabs (1320 - 1410)

Parked @ 1320 and set-up scope, Eagle observer @ Marine Dr. "Chuck" was at parking area & came over to talk w/ me.

Highest # of ducks I've seen at this site (during counts). Chuck said "not many at high tide but many more now. Will be difficult to count. Watched one very large group of wigeon flush from west & fly closer → landed. Not sure why they flushed.

Various species mixed together. Tide going out. Just did my best to count. Gulls & shorebirds also present.

\* Rather difficult to count / ID species past (to west) of river mouth. Will check w/ Sue Thomas to verify if she could see this area from the refuge.

Best try for count: (17)

Divided count W. of pier poles +  
E. of pier poles. Will also add in count  
from lagoon area in front of residences.  
(saw lots of ducks there during aerial  
survey)

3 Crab Counts:

West of pier

69 Pin tails

23 Green winged teal

≈ 1400 Wigeon \* No

≈ 800 Mallards Brant

12 Buffleheads

East of pier

123 wigeon

13 mallards

60 pin tails

Estuary Pond

(Hiked to area  
from parking  
lot.)

10 mallards

4 N. Shovelers

13 pin tails

Lagoon pond mostly Frozen. Lady  
walking w/ 2 dogs along beach.

Talked w/ Anita on the cell phone

(8)

@ 1415. Told her counting @ 3 Crabs was tough → lots of ducks. Requested she consider counting @ Marine Dr. while Sue & Lorenz counting refuge area. Sue had called me earlier and thought it would be best to have saltwater counts → 3 Crabs, Marine Dr. & D. Refuge @ the same period of time. Duck #'s will change with change of tide.

Weather Update: Stunning view of Mount Baker w/ waterfowl in foreground. Mostly cloudy now. No precipitation. Minimal wind. Temp  $\approx$  40°F.

Headed to Golden Sands.

Marshall Ponds

Frozen with no ducks.

Ran into Matt Heins along 3 Crabs Rd. Talked w/ him for 10 minutes. He was @ Les Jones pond earlier. Reported seeing 10-12 coots only.

Golden Sands (1420 - 1455)

(9)

Slough @ entrance mostly frozen.  
Open @ north edge,

2 ♀ mallards

3 ♂ mallards.

Drove in left loop road.

256 wigeon

4 mallards

} Feeding  
on grass.

Slough to east mostly frozen - far  
east edge w/ open water,

121 mallards

15 wigeon

Hiked along slough (mostly frozen)

To south:

12 mallards

4 wigeon

To North:

1 mallard

\* 3 immature eagles perched in large  
cottonwood above the main group of  
mallards. Drove to the west side  
of the loop. Could see mega  
ducks @ house for guy who usually  
feeds them.

Golden Sands (cont.)

West Slough (by house who feeds ducks),  
Slough w/ open water → not frozen,

186 mallards by house & in water

250 mallards in slough to N.

\* Sure wish my camera battery had not died. Solid ducks in slough - could barely see water.

Wigeon mixed in but they were the ones I counted earlier. They flushed to slough when I drove past them.

Parked @ gate to Quacker Farm

(Willits). Matt. Heins unlocked gate earlier for me. As soon as I got in gate, ATV pulled up w/ Kathy Smith & John. They were out

hunting. Reported seeing no ducks. They had me hop in and drove me

around to ponds. (A few new ones.) Decoys & blinds present @ ponds. Ponds mostly frozen.

Willits (1515-1610)

(11)

Ponds mostly frozen. No ducks observed during drive around area. None seen earlier by John.

Les Jones (1615-1640)

Matt reported only seeing coots @ this pond earlier today. He gave me permission to park inside his gate. Parked and hiked over to pond. Found a few viewing areas (w/out getting too wet). Also did my best to search from 3 Crabs Rd.

13 coots

3 pairs gadwalls

2 ♀ buffleheads

Some ice obvious but some open water present.

Getting pretty dark but decided to go park at 3 Crabs again.

Arrived @ 1642. Much fewer ducks now. Very few to east of pier.

Total estimate  $\approx$  1500-1800.

More pintails, less mallards than earlier.

Starting around 1648 large groups of birds flushed up from water + flew over → flying to SE.

Big huge groups of various species. Some were flying low, I could hear wing beats. Pretty amazing site!!

Most gone from water by 1710. (Wonder if they were heading to Graysmarsh ??)

At 1715 still 250-300 ducks to west on water. Very dark → poor visibility so unable to ID.

Guy in minivan pulled up and started playing Bob Seger quite loud. Sort-of ruined the magical moment.

Started to leave but talked w/ another local guy parked in pick-up truck. He thought I might have been from Enforcement.

(He got past ticket for not marking his fish card promptly.) Told him he would need to get a Discovery Pass for truck to park @ WDFW site.

Headed home @ 1730.

Additions to Dungeness Survey,

(13)

Meadowbrook Creek

Elaine Smith called in the evening (1/6) and provided the duck count for her pond.

Did 2 counts:

Noon

\* Will use this count

→

52 mallards

36 wigeon

1500

32 mallards

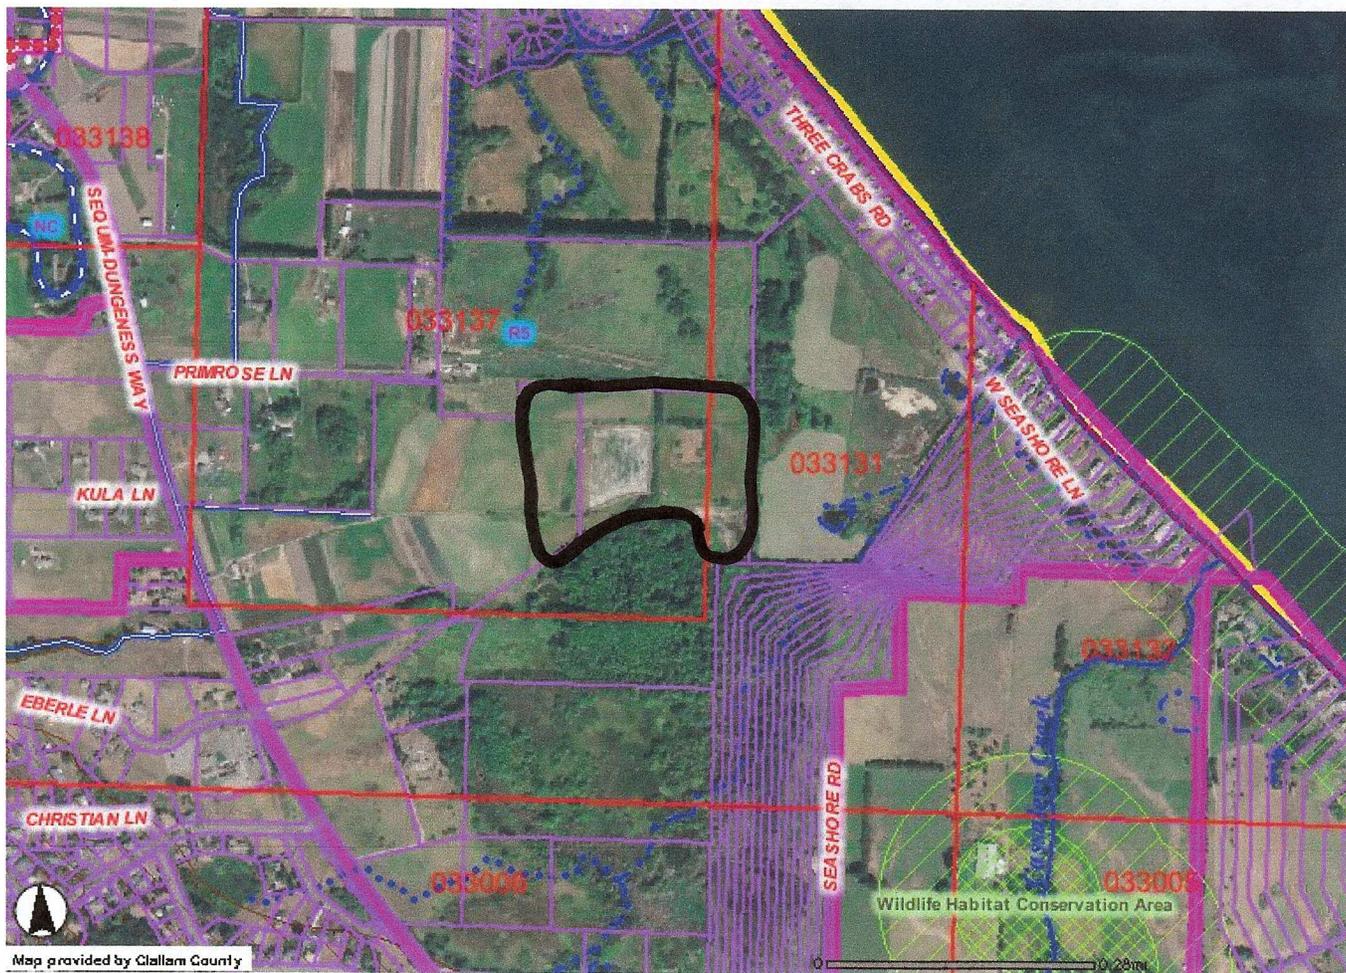

33 wigeon

\* Will add this count to my earlier counts for the creek.

Hussey

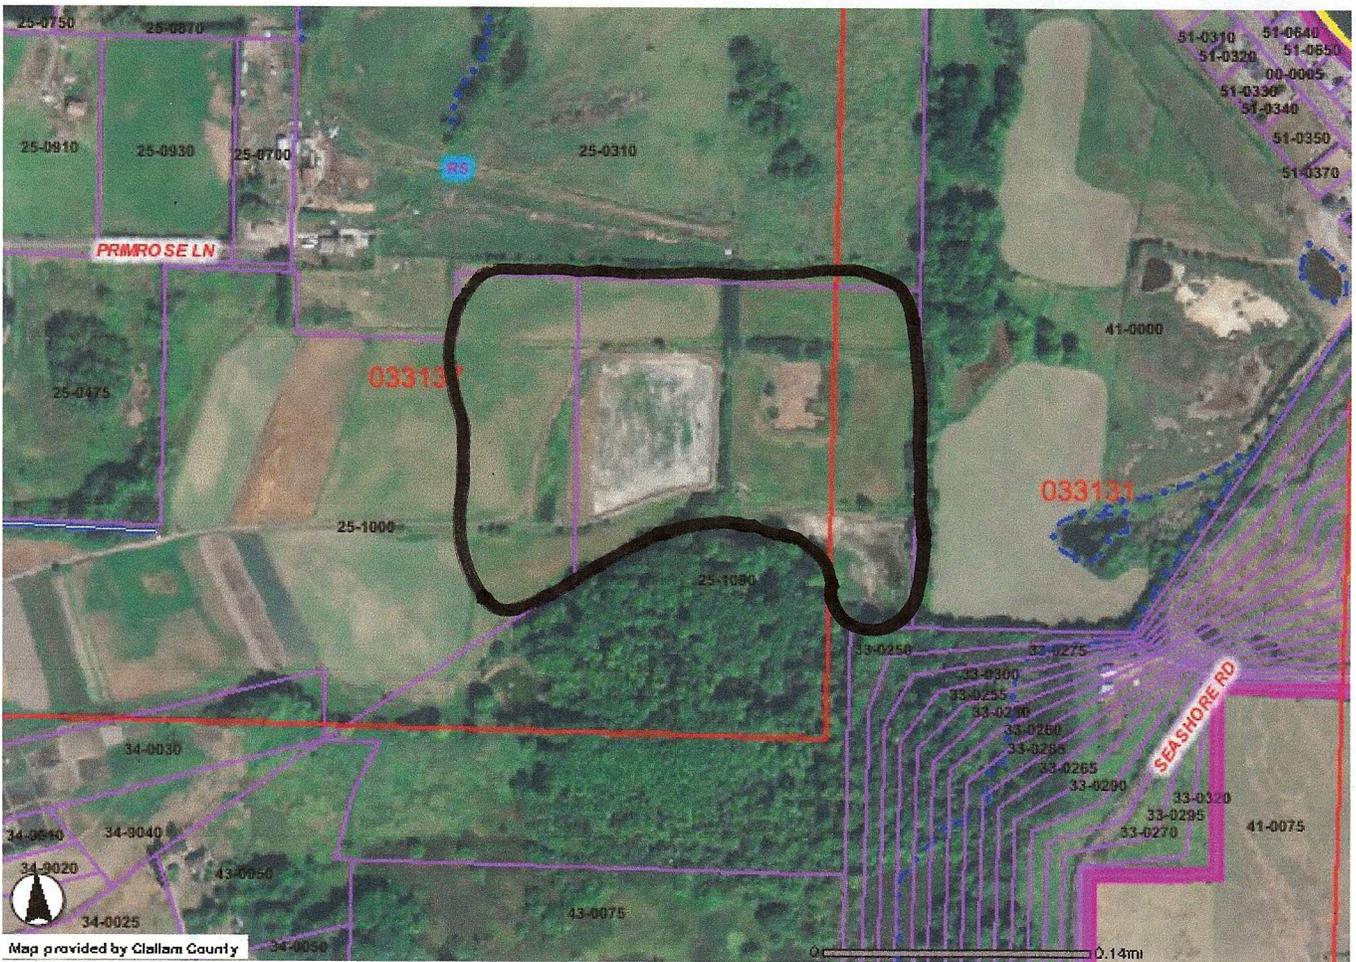

Gary Hussey sent an e-mail message to report all ducks he counted on his property for 1/6. Searched property in the AM + PM. All water frozen.

Only saw 1 N. Shoveler ♀.

# Bell Farm

\* Search area for next year. Ponds frozen in 2014. No ducks present.

# Bell Farm

\* Search area for next year. Ponds frozen in 2014. No ducks present.

---

Hi Anita,

I have been working on the mid-winter survey data. I decided to stay with the format from last year. Batch one is the Sequim-Dungeness survey area. Attached you will find completed spreadsheet pages, a summary table with some notes to you, and copies of my field notes for the surveys. Please let me know if you have any questions about what I have provided to you.

I will be working on the other survey areas (Batch 2 – East of Sequim, Batch 3 -Sequim to PA, and Batch 4 – West of PA) this evening and tomorrow. My goal was to have all data to you by the end of this week. I'm happy to work with you to produce all needed maps.

More to come....

*Shelly Ament*  
*WDFW Wildlife Biologist*

## Notes for Anita

- 1) We discussed the group of wigeon we both observed at the Sequim Reclamation Site. We decided that you will include these birds with your count for WA Harbor. You will modify the WA harbor map to show the dairy farm fields and Reclamation Site.
- 2) You will need to modify the map for “Smith Farm Field” to show the area of Clapp and Smith fields south of Port Williams Road and east of Smuck Road.
- 3) You will need to modify the “Port Williams Rd.” map to show all the fields north of Port Williams Road.
- 4) Once again - I did include the count from my neighbor’s pond with the Meadowbrook Creek count (lump vs split). I also included 5 unk. C. geese that Kim observed.
- 5) I listed “Seahorse Rd.” as a new Priority 3 site. This is the farm pastures, wetland areas, and, saltwater channel along Seashore Road (off Jamestown Road). We can produce a map together to show the area.
- 6) Take note – once again I noticed that Don’s formula for the “Total Ducks” column does not include the mergansers, unidentified, or misc. numbers. On my forms the “Unidentified” usually refers to the hybrid mixed and domestics. The “Misc” is usually grebes or cormorants.
- 7) I made note on the forms that there was no hunting at Husseys or Willits on the day of our counts.

# Mid-Winter Waterfowl Survey ①

Date: Jan. 7, 2013

Area: Dungeness Sites.

Weather: Mostly cloudy, no precip.

Temps  $\approx$  45-50°

Left house around 0930 after meeting w/ Kim

4 adults to W.

Smith Field (Port W.) (cont.)

Swans

Group k. of 4 adults -

26 adults

1 w. fronted goose

28 w. fronted geese (total 29)

14 Canada Geese (no bands or collars)

33 + 3 added

(30 swans in field)

All adults,

4th Group Group (in fenced area)

20 swans

17 adults 3 juv.

141 Canada Geese (also in

fence) → Need to come back & search for

1/3 smaller = cadet

bands or collars

Port Williams Rd, 1550

No swans/ducks obvious

Port Williams (Salt Water) (8)

1600 18 buffleheads

3 Golden-eye (likely Burrows - white collar ring)

27 scoters (far out)

\* (see previous)

Getting hard to see.

3 Harlequin 1- ♂, 2 ♀

4 Common Mergansers

1 W. Grebe (w/ fish in bill)

2 Cormorants (unk. species)

No brant seen.

Smith Farm Field (Maple View Farm)

Large concentration of wigeon on grass just s. of Reclamation Facility Pond.

Started count then all flushed from grass to pond (no longer see)

Approximate # 350-400

(confirm w/ Anita)

"Murder" of crows in tree near farm.

Gulls present w/ wigeon.

No other waterfowl (swans, etc.)

Returned toward home, Parked off  
Friendly Ln & hiked around to  
survey Willits. 1625

⑨

(Hiked around until dark 1700)

Checked pond (sheet water area)  
closest to my house,

Blind-set-up

Numerous decoys (over 100)  
geese & ducks.

6 mallards }  
3 pintails } flushed & flew  
off.

Hiked to Quacker Ponds

Bald eagle perched high above  
main pond.

Only decoys on pond,

\* observed 2 pairs of mallards  
flying.

Getting dark so unable to  
cover pond w/ island (snow geese  
decoys). Gary reported 50 mallards in  
John & Barley field.

Called Hussey for his count: 85 total

15 Pintail, 5 N. Shovelers, 2 Buffheads

10 G-winged teal, 38 mallards, 15 wigeon.

## **Multiple files are bound together in this PDF Package.**

Adobe recommends using Adobe Reader or Adobe Acrobat version 8 or later to work with documents contained within a PDF Package. By updating to the latest version, you'll enjoy the following benefits:

- Efficient, integrated PDF viewing
- Easy printing
- Quick searches

**Don't have the latest version of Adobe Reader?**

---

Anita,

I have attached revised data forms for my Sequim-Dungeness surveys. (I actually only had to revise Page 1 and Page 2.) Please make sure you delete or dispose of the completed forms I sent you yesterday and use these new attached forms.

More forms coming shortly....

Shelly
