---

That looks like the lease site, with the swiggly line going through the grid lines is delineating the eelgrass beds. Yea!

This is better because all the feature classes are now available. The file I thought was the aquaculture site (called parcel\_20A013012) has incorrect spatial reference and I can't figure out what it is, but take a look and tell me if this is the right file to use- ParcelProposal\_USACE12282017

**Subject:** gdb file

Looks like this might be the one...

Thanks,

Lorenz Sollmann
