Fyi, below. I was working with folks on a response yesterday, but it would be great if we could find any past jurisdiction opinions before finalizing.

Jennifer,

It appears that any issues with jurisdiction and planning requirements should involve DNR. I've cc'd Sean Carlson at DNR and did give him some background about the lease. Jamestown will be bringing some oysters bags and other equipment to the lease at the next low tide series which is about a week from now. This is by no means a commercial planting, we just want to start with a couple of small areas to get a feel of how the oysters will do. Hopefully DNR and the Wildlife refuge will be able address any concerns before we start planting. Please contact Sean or me if you have any questions. Thanks.

Kelly

Kelly,
I apologize for not getting back to you by the end of last week, but i ended up in the hospital on Thursday for some minor - but unplanned- surgery.

After meeting with folks in the regional office, it was agreed that we need to ask the USFWS solicitor for clarification on our jurisdiction and planning requirements.

I should be back in the office in a couple of days if you have any questions.

- Jennifer
