---

FYI.

I will try to give you a call later in the week. I am buried in year-end reporting currently.

Hi Ralph,

It was nice to work with you too and your helpful group of "volunteers". I've attached 2 pdf maps, 1 with just the eelgrass location points and the other with the added track log information. I'm still working on entering and editing metadata and then can work on cleaning up the map itself. On the track log version the track lines are in blue, green and red line. I looks messy, because it is, and that will get cleaned up once I can work on that part of the process. But for now, you have a visual of what the survey base results look like. If anything, there are fewer points showing because as you will remember , for some eelgrass locations no points were actually created but included with another point. Hope this helps you for now.

Lorenz

Jennifer and Lorenz,

I realize the summer is a busy time and is flying by, but it has been nearly a month since we finished the second half of the eelgrass survey in Dungeness. It would be greatly appreciated to have the results before the end of the week.

Also, a couple of questions: What is the status regarding the cultural survey? Any word on the federal lead for the project?

Again it was a pleasure working with you both, I look forward to future days on the tide with you.

Ralph
