Jennifer,

I will be meeting with Greg and Mary Ellen at the Clallam County DCD regarding the Oyster farm on Monday October 11 at 1pm.

They were very good to work with during the hearing, and this opportunity to join with other community members to speak with them has come up.

I will NOT be representing the Refuge, or any other group, but am attending as a concerned citizen.

I plan to focus on one issue - the importance of a scientifically valid and thorough monitoring plan. This is what my letter and testimony in 2019 was previously about. The decision to move from 5 acres of bags to 80,000 bags may depend on the results of the BACI (before - after - control - impact) monitoring plan. I will suggest the proposed monitoring plan needs to be independently reviewed by an expert environmental impact assessment organization (not one previously employed by the tribe), for the sake of the birds, the county and the citizens of the US. Transparency is important to this process. I will be joined by several other influential community members.

Any thoughts or suggestions?

Thanks,

Judi
