**Importance:** High

---

See attached. This plan was funded by NFWF and had many people who provided input and reviews. There are several suggested management and research priorities listed for the Farallon NWR, including house mouse eradication.

Happy New Year everyone!

Please find attached the Final Ashy Storm-Petrel Conservation Action Plan. A huge thank you to Scott Hall and NFWF for funding this project. And many thanks to all of you for all your knowledge, input, comments and support in getting this document completed. I hope that you find it useful in planning future conservation efforts for Ashy Storm-Petrels. I believe that, at the very least, the highest conservation priorities and major information gaps for Ashy Storm-Petrels have been identified.

One issue that hasn't been addressed by the plan is the establishment of a formal or continuation of an informal Ashy Storm-Petrel working group. It would be great for someone or a couple of people to step forward and take on the role of organizing the group -- if that is something that is desired into the future.

If you have any questions please don't hesitate to contact me. I can be reached via email or by phone at [505-414-0028](tel:505-414-0028).

Mike Parker
