

**Status of Luckenbach Projects**

Past Assessment Costs	\$x
Loons/Kokechik Flats, Alaska	\$561,631
Grebe/Northern California Lakes	\$965,435
Mouse Eradication/Farallon Islands	\$975,597
Shearwaters/Taiaroa Head, New Zealand	\$55,649
Seabirds/Baja California Islands, Mexico	\$3,736,475
Dunes/Point Reyes National Seashore	\$501,447
Seabird Colony Protection Program	\$9,526,603
Corvid Management/Point Reyes	\$500,000
Reading Rock Murre Colony	\$225,307
Corvid Management/Santa Cruz Mountains	\$695,363
Old Growth Forest Acquisition and Protection	\$1,745,000
Rat Eradication/Queen Charlotte Islands	\$188,405
Nesting Habitat Restoration/Año Nuevo Island	\$974,037
Sea Otter Pathogens Education and Outreach	\$121,155
Trustee Council Administrative Oversight (Part 1)	\$460,000
Trustee Council Administrative Oversight (Part 2)	\$517,494

**Wave 1** in CG Legal Review (since early May)

**Wave 2** will be submitted soon

**Wave 3** has outstanding issues, but could be moved into Wave 2 if ready in time

Notes from Conference Call with NPFC on August 14, 2008:

Check if NPFC declared this an OPA incident. –either during Response or the Initiation (KVS, Chuck)

Old Growth Forest Acquisition and Protection - need to justify habitat values that would otherwise be lost in a project description. We need to make the case that there is a reasonable likelihood that the habitat would be lost if not for this project. See 5-year plan re: habitat type, rationale, contiguous habitat, and risk of logging and development. Along with this, we will send a proposal of how to credit this project, along with credit for corvid management. (Steve)

They are okay with the MAMU injury, but want to see more on the Monte Carlo (more transparency) with histogram of the results. (Matt)

They still need details re: Pt Reyes. (Chuck, Steve)

They seem okay with Snowy Plovers and Seabird Colony Protection.
