Hi Gerry,

Yes, I do live here as I am also the FWS liaison to EPA in San Francisco.

I should have explained that, according to WO guidance, PUPs for certain things (such as rodenticides) do come to the WO for review after your regional coordinator, Marco, reviews them. He is your primary contact. Nancy Golden in the WO would do the technical review; I will focus on the NEPA issues which are very important for a project like this.

Sonce
