Gerry,

I wanted to touch base with you to make sure I am on your mailing list for this project.

I am the acting National IPM Coordinator and would review your Pesticide Use Proposal for this project. Just in case you are not aware of this requirement, the use of any chemical such as a rodenticide on a refuge requires that a Pesticide Use Proposal (PUP) be filled out and approved before the rodenticide can be used. This insures that all chemical useage on refuges is controlled to assure the least damage to other non-target species and the environment.

I am aware of the scoping meeting this Thursday and will attend. I look forward to meeting you and your staff.

Sonce
