Hi Gerry:

Welcome back! I just got back from the Palmyra eradication yesterday myself, and am eager to see how your field season went. I called your office this morning, but you were not in yet.

I'm back in the driver's seat here as Farallon Project Manager at IC, and Brad is leaving town for a week, so let's you and I talk today about everything that needs to happen well before next Friday's meeting. There is a lot of prep work to do, facilitators to contract, agendas to finalize and prep documents to revise and review, etc.

Several things need our immediate attention today or tomorrow, the first of which is you or Zach emailing Gabrielle **all** of the written comments that USFWS received during the scoping period. She only has received a few (Wildcare's and the meeting notes). We have the ABC letter, but nothing else, so we'll need all the others by Wednesday or Thursday. Zach was going to collate all of them, but since I hear this is his last week, perhaps that may not happen before he leaves? Gabrielle can do it, but she'll need them ASAP to do it in time.

Looking forward to hearing from you! Give me call on my cell phone: 831-420-7835.

Dan
