During earlier one day-strike-team visits to the island (between Oct 22 - Nov. 25), there may be other individuals requested to be on the boat to help load gear onto the island during any boat or Coast Guard helicopter supply runs, or to evaluate the feasibility of UAVs or canine hazing. We will inform you as to any requests for such day-trips and individuals in the next week or so as schedules get refined.

Looking forward to talking with you more later today (at 10 and 2!)
