Subject: RE: Farallon Fall Field Trial - Safety Plan
Date: 11/01/2012 12:46 PM

Hello Team Farallon!

Attached for your review and approval (or comments) is the **Farallon Hazing Trial Safety Plan**. Please review it within the next week, and send an email to Maddy that you've received it and agree with its provisions.

If you have any comments or suggested changes, please get these to **Maddy Pott by next Friday, November 9th**.

- One element that will require your input is the designation of an overall *Safety Officer*. We suggest that it could be the RPBO Biologists Jim Tietz/Ryan Berger, as they are familiar with island safety procedures and will not be tasked with other duties during the trial.
- We will also need to decide if we should specify a "medic" (Winston or Derek?) to fill a first responder role. Your feedback is appreciated!

Its *November* already, so this week would also be a good time for those of you who have not taken the online **ICS** course to do so.

The revised **Trial Plan** is almost ready for your review as well, and we will be sending it out for final review in the next few days.

(We are awaiting the IHA provisions from NOAA, and the revised monitoring data sheets and protocols from PRBO.

We may send the Trial Plan out for review on Monday as is, if we do not have those elements to include in it by then.)

With the Thanksgiving holidays (Nov 22-23) immediately preceding our field trial, it would be best for these revisions and decisions to be made by us all early this month, prior to the group scattering for turkey and family gatherings.

Lastly, if you've not begun to make your travel plans to arrive in the San Francisco area by noonish

Monday Nov. 26, please do so now.

Maddy will be in touch with you soon about hotel arrangements on the night of Nov. 26th in Sausalito, likely in Larkspur/Mill Valley.

Thank you for your responses to the **Safety Plan** in advance!

Dan Grout
