Hi Melissa

Don't know what to do with an email like this. I'll leave that up to you.

Russ

Subject: rat poison on Farallon Island

PLEASE do not allow the dropping of rat poison on Farallon Island. This is a disasterous idea! The poison will affect all the birds and animals up and down the whole food chain. Not to mention washing off into the ocean and affecting the fish and mammals there. Man puts enough stress on the ocean without adding more poison.

Neutered cats are the answer. Cats hunt day and night, prefer mice to other prey, and when they are neutered will not multiply causing another problem.

Thank you for your consideration. Sincerely, Diana Sutton
