Subject: Scoping Notice for the South Farallon Islands Non-native Mouse Eradication Project
Date: 04/28/2011 12:35 PM
Attachments: [South Farallon Islands Scoping Letter.pdf](#)

The U.S. Fish and Wildlife Service (Service), San Francisco Bay National Wildlife Refuge Complex is preparing a draft environmental impact statement (EIS) for the South Farallon Islands Non-native Mouse Eradication Project, located off the coast of San Francisco, California. This project proposes to help protect and restore the ecosystem of the South Farallon Islands, particularly seabirds and other native biological resources, by eradicating non-native house mice (*Mus musculus*) and preventing their future reintroduction.

At this time, the Service is soliciting comments to be incorporated into the draft EIS. A public meeting will be held May 12, 2011, 6:00-8:00 PM, at Fort Mason, Building 201 in San Francisco, California to provide information on the proposed project and to take comments. Comments can also be provided in writing.

See the attached announcement for more information.

Gerry McChesney
Manager, Farallon National Wildlife Refuge
