The BA is correct. I will revise the WR accordingly. It is a total of 3 per launch campaign (two test fires and one launch).

Amy

Subject: WR/BA clarification

Hi Amy,

Reviewing WR and states under Operation on page 6 "Each launch is associated with an estimated three static fire engine tests." However, the BA, page 3, for the BCO states 2 static fires. "Each launch is associated with an estimated two static fire engine tests."

It would make sense to be 3 if deluge system may operate up to 30 times a year, but just for clarification so I can correct in BCO.

Mary
